PROFESSIONAL SUMMARY

Quick learner, a self starter and a results-driven software engineer with an experience in Mobile and web App development along with web3 and blockchain experience with a strong background in various programming languages. Have passion about AI and Robotics and a thirst for knowledge, and am always eager to learn new skills and technologies to better my self and benefit the organization. And have Proven ability to learn new technologies quickly.

PROFESSIONAL EXPERIENCE

AI/ML Intern

PakSoft Solutions

Dec 2025 – Feb 2026 | Remote

- Production Python + backend services (FastAPI)
- Databases
- ML + CV + GenAI
- OpenCV + YOLOv8 + pytx3
- System design thinking (latency/cost/accuracy tradeoffs)

React Native Intern

Zimo Group UK

Feb 2023 – Mar 2023 | Remote

- Contribute to their Project
- Video Component + Animation
- Firebase Push Notification

React Native Intern

BitSol Technologies

Jul 2022 – Sep 2022 | Pakistan

- Start with basics
- Hooks + Components
- Props + Data Handling + State Management
- UI/UX/Design

EDUCATION

Bachelor of Science in Software Engineering

Comsats University Islamabad

2020 – 2025 | Islamabad, Pakistan

SKILLS

React Native CLI/Expo

React JS

Functional component

Context API

Redux

Video Component

Animation

Google Maps

AsyncStorage

Hooks

Navigation

ES6

Responsive Design

MongoDB

Node.js

Express.js

RESTFull API

GitHub

Firebase

Push Notifications

JavaScript

TypeScript

Java

Python

PHP

Laravel

HTML

CSS

Bootstrap

JQuery

YOLOv8

OpenCV

pytx3

web3

ethers.js

blockchains

Problem Solving

Analytical Thinking

Teamwork

PROJECTS

Rubi Robot

Dec 2025

Building an intelligent mobile robot that understands voice commands, detects objects, and navigates autonomously using computer vision, sensors and natural language processing.

- Raspberry Pi-based mobile robot with YOLOv8 object detection (chairs, furniture, person, phone etc) and real-time computer vision
- Implemented voice command system with wake word detection ("Rubi") and speech-to-text using Google/ Vosk APIs
- Developed autonomous navigation allowing robot to scan surroundings (360°) and approach target objects
- Integrated L298N motor driver with precise PWM control for 4 DC motors
- Created Pygame simulator to test motor logic before hardware deployment

Technologies: Python, OpenCV, YOLOv8, RPi.GPIO, SpeechRecognition, pytsx3, Sensors

AZ-Pay (A P2P currency exchange app)

Nov 2024

AZ-Pay is a Binance P2P-inspired mobile app enabling secure peer-to-peer currency exchange and transfers across multiple countries. The platform facilitates real foreign currency trading with escrow protection, real-time rates, and multi-currency wallet support.

Key Features:

- Multi-currency P2P trading (USD, EUR, GBP, PKR, etc.)
- Secure escrow system for safe transactions
- Real-time exchange rates & market orders
- Money transfers
- User verification
- Chat system for buyer-seller communication

Technologies: React Native, Node.js, express.js, MongoDB, React.js

Mobile Apps

I have built and work on other Apps Including

- AZ-Ride Share
- Mini Trust Wallet (Web3 Wallet for crypto)
- GymIstan
- Thumbnail Genius
- Virtual Stylist

Technologies: React Native, React

INTERESTS & HOBBIES

Traveling

Cricket

Robotics

Blockchain/Crypto
